Subject: RE: Water analysis reports for well bore assignments in Walsenburg, CO

I wanted to follow up on my email below and the voicemail I left you a week or so ago regarding some additional water injection permits in Utah that we want to submit. I would like to schedule a call with you, our VP Operations (Kevin Dickey) and me at your earliest convenience so we can move forward with submitting our Utah permits as well as get the bonds released for the injection wells in Colorado.

Your voicemail indicated you are travelling this week but would be checking emails and voicemails. Please let me know which days/times you are available next week so we can schedule a call.

Thank you for your assistance.

I followed up with Desiree at IMA, and she hasn't received the letter or the original bond documents. We would like to get this matter resolved so we can stop paying bond premiums related to these wells. Can you give me an update on the status of this matter?

Thanks for your assistance with this matter.

Thank you for the instructions. Please send the documents directly to our bond broker, Desiree Westmoreland with IMA. Here is her contact information.

IMA, Inc.

Attn: Desiree Westmoreland

8200 E. 32nd Street North

Wichita, KS 67226

316-266-6324

desiree.westmoreland@imacorp.com

Thanks again for your help in getting this bond requirement released. Let me know if you have any further questions.

Hi Rich-

I apologize for the delay in getting back to you. With regard to your financial responsibility question below, the EPA will draft a release letter and send the actual bond and associated documents to the company or a person designated by the company. Please let me know who I should send the documents to and we will process the request to release the bond. I am out of town on travel this week, but should be able to work on this request next week.

Thank you and please let me know if you have questions or need additional information.

Thanks,

-Kimberly

Subject: FW: Water analysis reports for well bore assignments in Walsenburg, CO

Hi Kimberly,

Petroglyph was able to providing water analysis of the Gonzales 02, Rohr 04 and Rohr 05 wells to the current well owners. Based on the information provided, we can go ahead and close out the Financial Responsibility for the wells. For reference, the UIC Permit numbers is CO51221.

Richard Beath from Petroglyph has a question regarding the bond release. I'm deferring to you for the answer, see his email below.

Subject: RE: Water analysis reports for well bore assignments in Walsenburg, CO

I just received the second receipt confirmation. Attached are the following:

- Rohr 04 and Rohr 05
 - Letter to new well owner, William & Alice Rohr
 - Water analysis report from 2012
 - Proof of delivery
- Gonzales 02
 - Letter to new well owner, Patricia & Kelly Burgess
 - Water analysis report from 2012
 - Proof of delivery

I anticipate this will satisfy the requirements in order to release the bond requirement. Please remind me, do you send us a letter that we can provide to our bonding company to obtain the release?

Thanks, Gary.

Yes. The new owner of Rohr 04 and Rohr 05 has been provided the water analysis report. We have not been successful yet in delivering the report to the new owner of Gonzales 02, because they have a new address and have been out of town when we tried to make the delivery. We resent the package and expect to have receipt confirmation shortly. As soon as we have that confirmation, I will email you an electronic copy of the package we provided to the well owners so you have exactly what we sent them. I will also include proof of delivery.

I apologize for this taking so long, but we expect to have receipt confirmation on the Gonzales 02 shortly.

Thank you for your patience.

Hi Richard,

Any updated regarding providing the water analysis reports to the current well owners of the Gonzales 02, Rohr 04 and Rohr 05 wells in Walsenburg, CO? We'd like to get the Financial Responsibility passed over to you guys.

Hi Rich,

We touched base last month to see whether you guys may have provided water analysis reports to the assignees who inherited the drinking water wells from Petroglyph down in Walsenburg, CO. I'm emailing to see whether there has been any update on the situation? Thanks.

Subject: Petroglyph update

Thanks for the follow-up call. The person that was in charge of our Raton project at the time the assignments of those well bores was done is no longer with the company. So our Land department is reviewing the documentation to get caught up to speed. I think we will find that water sample analysis was already provided to the assignees, but we should have that confirmed pretty soon.

Thanks.

Rich Beath
